

TRIPOLI WAY PROJECT

PROJECT UPDATE JANUARY 2025

TRIPOLI WAY PROJECT

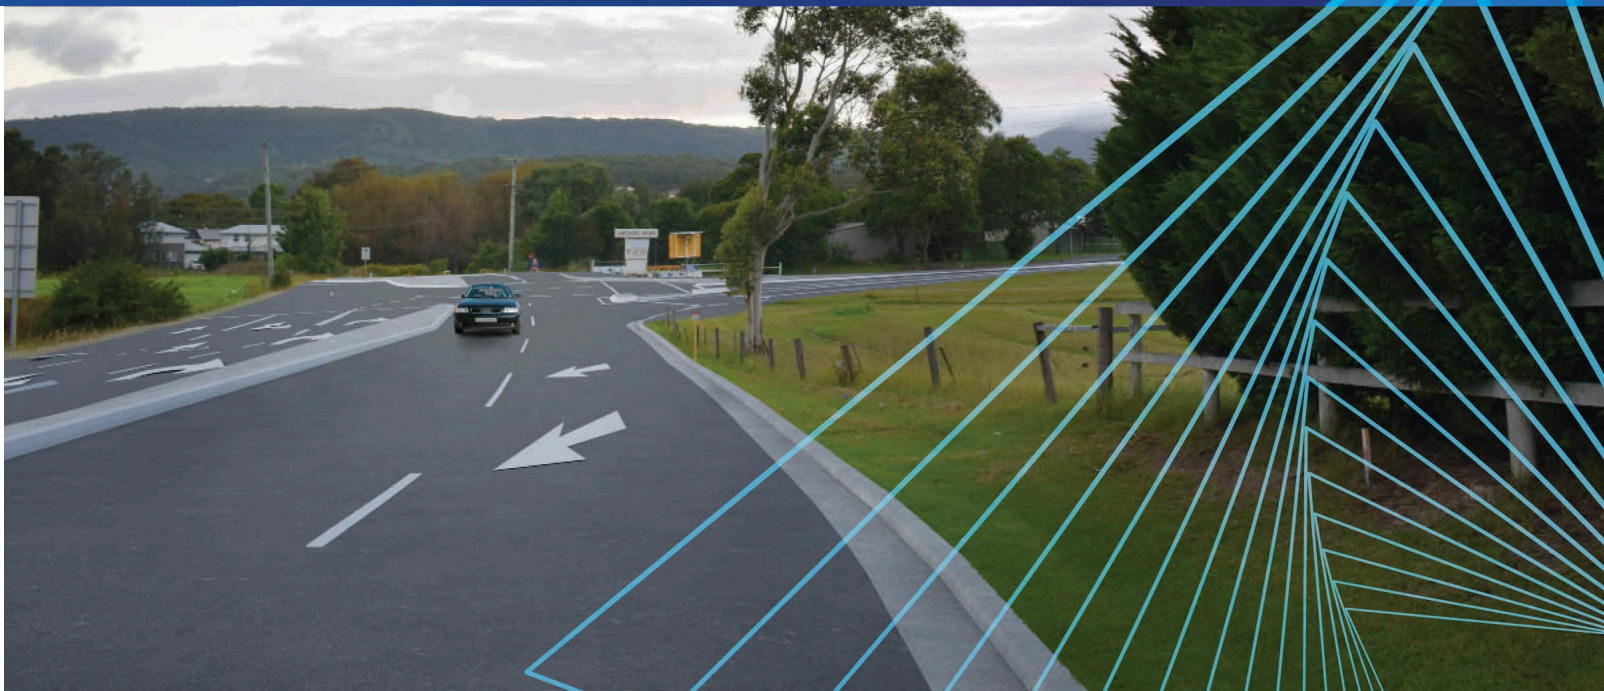

PROJECT UPDATE JANUARY 2025

What work is being done?

- Electrical works includes:
- Establishing compound area and surveying.
 - Some removal of trees and vegetation in verge.
 - Drilling, trenching and laying conduit.
 - Backfilling trenches or steel covering at the end of each day.
 - Removing existing overhead power poles and providing private property connections as required.

What are the immediate impacts to residents?

- Access to roads and homes will be temporarily restricted.
- Short-term power and utility outages.
- Noise from machinery.
- There may be vibration from some equipment.

When is the work happening?

Most of the work will take place during the day between **7am and 6pm Monday to Friday**.

Some work may need to be carried out at night to help minimise traffic impacts and ensure safety to the public and workers. Residents will be notified prior to any night work.

Estimated timeline of the initial early works is five months.

Working with you

We understand the impacts in your neighbourhood may be disruptive during these works.

We want to work with you to create a set of mitigation measures and solutions to help support you during the works period.

Over the coming weeks the contractor will provide you with information about these works through notifications in your letterbox and email.

Upcoming work on Tripoli Way

Preliminary works to relocate utility services (communications, power and gas) are due to begin in February, weather permitting. Work will be taking place primarily on Tripoli Way and The Expressway, as well as adjacent parts of Calderwood Road and Terry Street. These works are being carried out by contractor Ferrycarrig.

About the Tripoli Way Project

The construction of the Tripoli Way Extension is set to improve the traffic flow and road safety at key intersections within the Albion Park town centre.

The extension of Tripoli Way has been part of the Council's long-term strategic plan, designed to efficiently manage the growing local community.

The primary objective of this project is to alleviate congestion on the Illawarra Highway in Albion Park by establishing an uninterrupted travel route connecting Terry Street in the east to Broughton Avenue in the west, effectively bypassing the town centre.
